

WENZEL UK OPENS NEW TECHNOLOGY CENTRE

January 20, 2021

The new WENZEL UK Technology Centre is open and ready for business. It houses a wide range of Metrology Systems from Optical Non-Contact Solutions to Shop Floor Ready CMM's. The Centre itself is located in Central England in Coalville meaning customers from the North and South have access to the Centre for demonstrations and component checking.

David Taylor, WENZEL UK Managing Director stated: "At WENZEL we are always striving to provide customers with the best possible solutions, what better way than showcasing the solutions than at a new site with the latest equipment? Of course we appreciate these are trying times for businesses. The WENZEL applications team are already set up with social distancing measures in a clean and spacious environment to ensure the safety of our staff and our customer alike. That said and as an alternative we can provide online demonstrations using cameras and specialised software. Our aim is to make it easier for customers to see, feel and touch the quality of our products and advise them on the best course of action for their metrology needs."

"Since 1994, our WENZEL UK branch has been an important part of the WENZEL Group," explains Managing Director Dr Heike Wenzel. "The Brexit is regrettable, but does not change the importance of the market. We will continue to serve and support our customers in the best possible way in the future."

We hope to be able to hold the official inauguration ceremony soon.
